- You cannot separately cancel either component (NBN Broadband or Voice Service). Cancellation will cease both services

NBN Speeds

Typical Evening Download Speed is measured between 7pm and 11pm. Actual throughput speeds may be slower and could vary due to various factors including type/source of content being downloaded, hardware and software configuration, the number of users and performance of interconnecting infrastructure not operated by TPG. Devices connected by Wi-Fi may experience slower speeds than those connected by Ethernet cable.

Equipment Required

If you do not already have the required NBN infrastructure installed at your premises, you or an authorised person over 18 years of age will be required

to be home on the day of installation for a technician visit. If we find that you will require a technician visit to perform the installation, we will advise you of the date and time after registration. You need an NBN compatible modem to connect your devices to TPG NBN Broadband service.

To be provided a working Voice Service, you need a standard phone handset (approved for use in Australia) and you must choose the option with TPG modem included.
