Home Wireless Broadband Speeds: Home Wireless Broadband has a maximum speed of 20Mbps for download and 2Mbps for upload, with a Typical Evening Speed of 15Mbps for download and 1.9Mbps for upload. *Typical Evening Speeds are subject to change and measured between 7pm and 11pm. It is not a guaranteed minimum speed and you may experience slower speeds during this period and at other times. Home Wireless Broadband is suitable for 1-3 users for browsing, emails, social media, streaming music, SD and HD video. It is not suitable for 4K streaming and may not be suitable for online gaming. Home Wireless speeds are variable and may be subject to data deprioritisation. This could mean that during periods of congestion some data traffic will receive less priority over other traffic on the network, and you may experience slower Home Wireless speeds as a result.
